

## Registering on ChemSpider

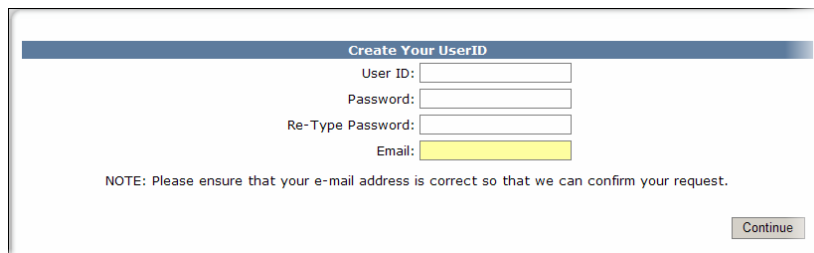

### Making Yourself a Registered User of ChemSpider

## Introduction

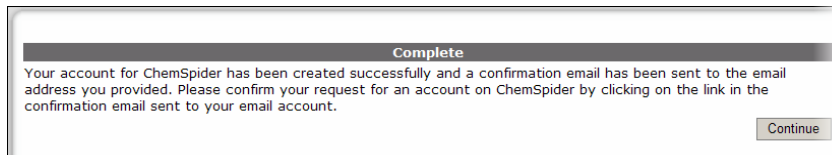

The ability to become a registered user of ChemSpider has been unveiled on the website. There are a number of added capabilities made available to registered users and this will increase with time. For now you must be a registered user in order to be able to curate data and to add spectra to the ChemSpider database. Registration is simple – follow the instructions below.

## Registration Process

Visit <http://www.chemspider.com/RegForm.aspx> and you will see the UserID creation form below. Simply enter your chosen UserID, password and your email. Your email address will be used to complete the registration process.

When registration is complete you will see:

You will receive an email requesting confirmation of registration as shown below.

Dear chemspider,

Thank you for creating an account on the ChemSpider Web site.

To activate your account please click on the link below:

<http://www.chemspider.com//RegConfirm.aspx?id=c27166f2-89f9-4546-84a2-c8815d596311&ticket=1080288434&type=1>

If you did not request a ChemSpider account, or if you are experiencing difficulties in completing this registration process, please contact us at [info@chemspider.com](mailto:info@chemspider.com).

Please do not reply to this message.

# Technical Note

Clicking on the confirmation URL completes the registration process and requests you login.

Congratulations, you have just successfully confirmed your registration. You can now log into the system.

**Log In**

User Name:

Password:

Remember me next time.

Please click on Profile once you are logged in and complete the details of your profile. Update the profile and your registration is now complete.
